EXPERIENCE

Remote Developer

Adimo

📅 September 2019 – Current 📍 Remote

- Developing a Chrome extension that aims to reduce the time taken to integrate a new client with Adimo technology from a few minutes to just a few clicks.

Software Intern

Adimo

📅 June 2019 – August 2019 📍 Glasgow

- Laid the foundation for a brand new analytics platform powered by Elasticsearch reducing the time to retrieve data by 90%.
- Developed a machine learning model that could automatically recognise ingredients from regular text on a recipe website. This has allowed Adimo to automate the process of integrating a new recipe with their technology. This process previously took a few minutes, now it takes seconds.

Software Intern

The University of St Andrews School of Computer Science

📅 June 2018 – August 2018 📍 St Andrews

- Developed data analysis software for a team of researchers at The University of St Andrews School of Medicine. This software made it possible to analyze and monitor the experiments as they were running.
- Developed data analysis software for a team of researchers at The University of St Andrews School of Medicine. This software made it possible for the researchers to analyze and monitor their experiments simultaneously as they were run.

Software Intern

Emax Systems

📅 June 2016 – August 2016 📍 Busby

- Developing Enterprise Resource Planning (ERP) software for manufacturers using Visual Basic and SQL.
- Provided general customer support for businesses struggling to use the software.

Waiter

Tanon Thai

📅 July 2018 – April 2019 📍 St Andrews

EDUCATION

Bsc. in Computer Science

The University of St Andrews

📅 September 2016 – Current

Williamwood High School

📅 August 2010 – June 2016

MOST PROUD OF

Winning JP Morgan Code for Good Hackathon
We developed an inventory management platform for the British Heart Foundation

Table Tennis Club Growth
Responsible for growing the number of members of the Table Tennis club to double of what it was last year.

Over 400 Hours of Volunteering at Oxfam

Completed Duke of Edinburgh Gold

STRENGTHS

Python Java C# C++ C
Javascript SQL HTML/CSS \LaTeX

Machine Learning Data Analysis
Full Stack Development
Human Component Interaction
Leadership Team Player

LANGUAGES

English (Native)
Chinese Mandarin (Fluent)

PROJECTS

RecycleCat

- My senior honours project which aims to tackle the problem of recycling.
 - Currently a work in progress.
-

Society Ticketing

- Built software in Python for societies at University to use as alternative to FIXR.
 - The platform is able to generate tickets with QR codes on them, wguccg can then be verified by the integrated QR code reader for admission.
 - This project has saved various societies more than £50 that would have otherwise gone to FIXR.
-

Rebuilding the University of St Andrews Table Tennis Club

- The Table Tennis club was an under-represented club. Since becoming president in 2018, I have built a website, increased the club's social media presence and doubled the size in terms of membership.
- I have also secured professional coaching for the club. This has contributed to the club consistently ranking as one of the top teams in Scotland.
- As the captain of the mens 1st team, I have led the team to top 4 finishes twice.

INTERESTS

- Represented the University of St Andrews in Student Sport Scotland and British University and College Sport competitions.
- Building computers and modifying computer hardware.
- Immersing myself in Virtual Reality games.
